

## Wolkenkijker - assembly instruction

Assemble your Wolkenkijker by attaching each new part with the supplied push rivets. In each step, the new parts to attach are shown in green.

- To use a rivet: align the holes, insert the narrow end, and press the round head until it clicks.
- To disassemble, slide a thin tool (like a knife) under the rivet head and pull it out.

<b>1</b>	Take the plate with the mirror. Keep the protective film on the mirror for now.	<b>2</b>	Attach the two triangular side panels to the mirror plate with 4 rivets. Press until you hear them click.
			
<b>3</b>	Slide the glass plate behind the front and fix it to the sides with 4 rivets. Remove the protective film from the mirror.	<b>4</b>	Fix the top panel in place using 6 rivets.
			
<b>5</b>	Attach the lens mount with 4 rivets.	<b>6</b>	Adjust focus by pointing at clouds (or a faraway object) and gently twisting the lens until sharp.
